

# SOUTHEAST GAP ANALYSIS PROJECT

## Species Modeling Report

### Striped Skunk

*Mephitis mephitis*

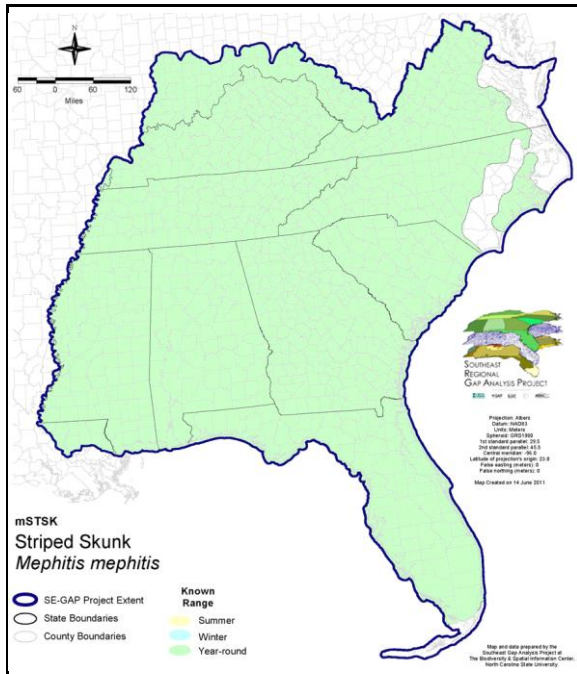

Taxa: Mammalian  
Order: Carnivora  
Family: Mephitidae

SE-GAP Spp Code: **mSTSK**

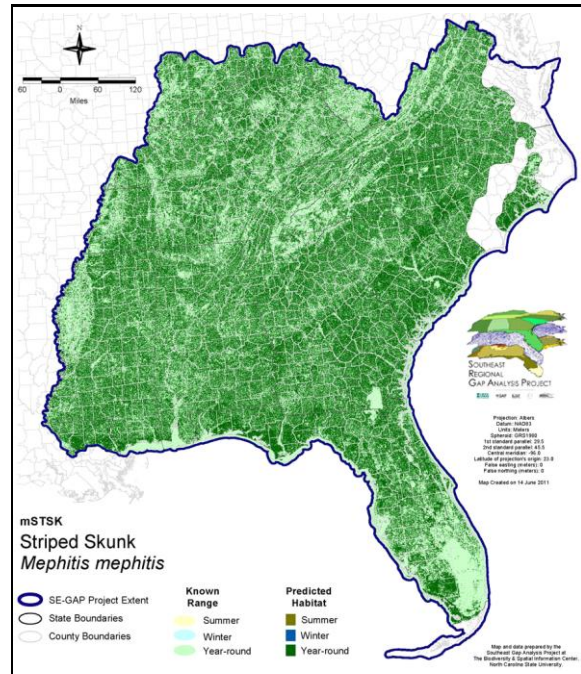

ITIS Species Code: 180562

NatureServe Element Code: AMAJF06010

#### KNOWN RANGE:

#### PREDICTED HABITAT:

GAP Status 1: An area having permanent protection from conversion of natural land cover and a mandated management plan in operation to maintain a natural state within which disturbance events (of natural type, frequency, and intensity) are allowed to proceed without interference or are mimicked through management.

GAP Status 2: An area having permanent protection from conversion of natural land cover and a mandated management plan in operation to maintain a primarily natural state, but which may receive use or management practices that degrade the quality of existing natural communities.

GAP Status 3: An area having permanent protection from conversion of natural land cover for the majority of the area, but subject to extractive uses of either a broad, low-intensity type or localized intense type. It also confers protection to federally listed endangered and threatened species throughout the area.

GAP Status 4: Lack of irrevocable easement or mandate to prevent conversion of natural habitat types to anthropogenic habitat types. Allows for intensive use throughout the tract. Also includes those tracts for which the existence of such restrictions or sufficient information to establish a higher status is unknown.

## PREDICTED HABITAT MODEL(S):

### Year-round Model:

Habitat Description: Striped skunk is found in all habitat types and is probably most abundant in forest edge habitats, brushy fields, and areas with heavily overgrown fence rows (Wilson and Ruff 1999, Brown 1997) This species is also frequently found in suburban/residential areas. Amy Silvano 27jun05

Ecosystem Classifiers: Edge/shrub shrub environment, did not select MU's rather except all pixels that fall within Ecotone Buffer. Amy Silvano 27jun05

Elevation Mask: < 1580m

Mask of Forest/Open Ecotone: Include within 125m of ecotone edge.

Mask of Woodlands and Shrublands: Include all woodland and shrubland interiors and 125m buffer from them.

### Selected Map Units:

Functional Group	Map Unit Name
Anthropogenic	Bare Sand
Anthropogenic	Bare Soil
Anthropogenic	Deciduous Plantations
